Setting up the tutorial in Adobe® Photoshop® 5

1a. First open the tutorial file:
    File > Open > tem1psd.pdf

1b. Accept the defaults for file
    width and height in the
    "Rasterize Generic PDF
    Format" dialog box, then
    enter 72 pixels/inch for
    resolution, RGB for mode
    and check the boxes for
    "Anti-aliased" and "Constrain
    Proportions":

Rasterize Generic PDF Format

Image Size: 1.39M

Width: 612   pixels

Height: 792   pixels

Resolution: 72   pixels/inch

Mode: RGB Color

☑ Anti-aliased ☑ Constrain Proportions

OK

Cancel

2. Next, save the file in Photoshop format:
   File > Save As > myfile.psd

Layers   Channels   **Paths**

3. Next bring up the paths palette:
   Window > Show Paths

4. Either click the icon to add a new path
   or select new path from the path options
   menu:

Layers   Channels   **Paths**

Path 1

Creates new path
